Specification Sheet for 9mm Suppressor

Model name: UZI INTEGRAL

Weight: 28 ounces

Length/Diameter : 12" x 2"

Material: Aluminium / Series Stainless Steel

Attachment: Integral Barrel Nut Attachment

MSRP: \$699

Description: This suppressor is specifically engineered to fit the UZI submachinegun family of rifles and carbines. It mounts easily to the existing threads on the front of the receiver. It requires no tools for installation or removal. These suppressors do an amazing job of masking the shooter's location during engagements with the enemy and preserving hearing. They balance the weapon really well and require only one stamp for transfer on the semi auto platform.
