

Liberty Suppressors Constitution

Disassembly & Cleaning Instructions

1. To dismantle the Constitution for cleaning, first clamp the spanner wrench in the vise with the pins facing up.
2. Insert the wrench into the rear cap detent holes. Unscrew the suppressor core from the tube using your hand top turn the tube.
3. Scrub the inside of the tube with a 10 ga. Shotgun bore brush or something equivalent to it.
4. Cleaning the baffles is best accomplished by taping off the front of the core to protect the paint and sand blasting the core till it is clean to your standards.
5. When cleaning the core be careful not to damage the threads.
6. To reassemble, lubricate the core with some oil and insert the core into the tube.
7. Coat the core threads in anti-seize lubricant and screw the tube onto the suppressor core. Tighten the tube as tight as possible by hand, this will be plenty of torque.

Enjoy your new suppressor !!!
