Specification Sheet for the Freedom series of Center
Fire Rifle Suppressors

Model name: HOOSIER

Caliber: 358 HOOSIER

Weight: Approximately 22 ounces

Length / Diameter: 10"

Material: Stainless Steel / Titanium

Attachment: 5/8-24 Thread mounted

Description: The Hoosier suppressor is the result of ongoing research and development here at Liberty Suppressors. These units use the innovative square bore technology that we developed for our Pandora line of suppressors to generate their incredible levels of suppression. These suppressors mount with 5/8-24 threads for better accuracy and repeatability. These suppressors produce world class suppression in excess of 30db and are lighter weight than most suppressors in the same class. Each suppressor is furnished with a Libertygear mirage cover to reduce mirage while shooting long range.
